## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's amendment filed on 02/08/2007 is acknowledged and has been entered into the records. The applicant has amended claims 1, 2, 7-9, 11-12 and 17 in response to the previous office action. The Examiner has accepted applicant's amendment. Claims 1-17 are currently pending in the application and claims 13-16 has been withdrawn from consideration. However, after a careful review, it has been determined that claim 17 has certain defect, which is the subject of this office action.

### ***Claim Rejections - 35 USC § 112***

2. Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 17, the recitation the control unit is "connectable" (see line 8) has created certain ambiguity with regard to the inclusion of the control unit in the claimed optical system. It has been held that the recitation that an element is "connectable" is not a positive limitation, but only requires the ability to be connected. It does not constitute a limitation in any patentable sense. This limitation has made the claim vague and indefinite. Appropriate correction is required.

### ***Allowable Subject Matter***

3. Claims 1-12 have allowable subject matter.
4. Claim 17 would be allowable if amended to overcome the 35 U.S.C. 112 rejections above.
